Save the Date! Friday, October 26, 2007

Celebrating 20 years! Join the Wildlife Habitat Council (WHC) on Friday, October 26, 2007, for an invasive species workshop at Fort Belvoir, Virginia. The workshop will include presentations on invasive plant identification, management equipment and techniques, aquatic invasive species, how invasive species affect the military mission, community involvement in management and tours of the pilot site. Presenters will include representatives from the Department of Defense (DoD), Invasive Plant Control, Inc., Arborchem Products and Mid-Atlantic Exotic Pest Plant Council. DoD personnel from within the Chesapeake Bay Watershed interested in presenting about their invasive species management programs are encouraged to contact the project coordinator (see below). The workshop will be held in the Tompkins Basin area at Fort Belvoir, overlooking Pohick Bay and Accotink Bay. There is no fee to attend the workshop, and any interested community members and groups are welcome to attend. For directions, workshop agenda and other information, visit WHC online by following the link below:
