

CASE STUDY TEMPLATE

Insert Case Study Title	
Name and Location	<p>Site Name:</p> <p>Site Location:</p>
Site Description	<p>Briefly describe site history; i.e., historical uses and current uses (or current uses prior to cleanup. You may want to insert a picture, aerial photograph, etc.) If sending this via e-mail you may want to send the picture separately.</p> <p>Is the project located in an urban/suburban setting or rural/agricultural? Briefly describe the area – is it located in a predominantly residential, commercial or industrial area?</p> <p>What is the size of the property?</p>
Site Reuse Description	<p>Briefly describe how ecological enhancements will be or have been incorporated into the site restoration project. If the site will have multiple uses; i.e., recreational, ecological, etc, you may want to include this information as well.</p> <p>What type of ecological restoration is being sought (wetland, prairie, etc.)?</p> <p>Why were ecological enhancements selected as an end use for this project?</p> <p>Is the community involved in the end use decision making process?</p>
Stakeholder Involvement	<p>Who were the stakeholders/partners in this site and were their roles/contributions?</p> <p>What were the concerns of these stakeholders and how were these resolved?</p> <p>Did any of these stakeholders/partners make a financial contribution to the project?</p> <p>Were any local, state, federal funding sources used?</p>

<p>Site Assessment Approach and Cleanup</p>	<p>Briefly state the results of the site assessment. Did the site assessment approach take into account end use?</p> <p>What is/were the sources of contamination? What are/were the contaminants of concern?</p> <p>Under what specific legal authority(ies) is the cleanup being performed (CERCLA/RCRA/OUST or other)?</p> <p>Briefly summarize the corrective action taken on site. If corrective action/remedy still in place please describe. Why was the particular remedy selected? Please describe any barriers encountered in employing remedy selected.</p> <p>Describe any long term controls (e.g., institutional controls) associated with the site.</p> <p>Was a closure letter obtained for the site? If so, what was issued and when? If not, are you currently seeking a closure letter?</p>
<p>Reuse</p>	<p>Describe the end use of the site. What are the benefits of the end use of the site (for the community, regulatory agency, etc.)?</p> <p>What has been the added value to the site?</p>
<p>Obstacles</p>	<p>What problems did you encounter during the corrective action? What was the nature of the problems encountered (e.g., regulatory, community perception, etc.) and how did you overcome these problems?</p> <p>Describe any other obstacles related with this project (funding, etc.).</p>
<p>Costs and Funding</p>	<p>How was this project funded, i.e., were there any redevelopment funds or other resources used?</p> <p>What was the total cost of the project?</p> <p>If an ecological enhancement was used in the remediation, were there cost savings associated with the selection of this remedy?</p>

<p>Economic and Other Incentives</p>	<p>What were the economic incentives (e.g., conservation easements) associated with this project?</p> <p>Were there any other incentives (e.g., public relations) associated with this project?</p>
<p>Time</p>	<p>How long did it take for this project to be completed? If the project has not yet been completed, is there a time estimate for completion</p>
<p>Other</p>	<p>List any other information that may be of value for this case study. This can be used to insert a “lessons learned” section, or highlight other information of interest. Also, you may add additional sections as needed, if additional information does not fit in the categories above.</p>
